PDRadiopharma Inc.

Dr. Masato Murakami, President and Representative Director, Participates in a Japan Atomic Energy Commission Expert Subcommittee

The Japan Atomic Energy Commission has established the Expert Subcommittee on the Promotion of Development, Manufacturing, and Use of Radiopharmaceuticals and the Strengthening of Their Supply Chain, effective April 15, 2026, to examine future approaches to promoting the development, manufacturing, and use of radiopharmaceuticals and strengthening their supply chain, in light of global advances in radiopharmaceutical research and development and changes in the environment surrounding medical radioisotopes.

Dr. Masato Murakami, President and Representative Director of the Company, participates in the subcommittee in his capacity as Vice President of the Japan Radiopharmaceuticals Association and as President and Representative Director of the Company.

The Company has been engaged in the manufacturing and stable supply of radiopharmaceuticals, as well as in the research and development of pharmaceuticals that contribute to the realization of theranostics. Through this subcommittee, and in collaboration with the Japan Radiopharmaceuticals Association, the Company will provide input from an industry perspective to support constructive discussions on promoting the development, manufacturing, and use of radiopharmaceuticals and strengthening their supply chain.
