PDRadiopharma Inc.

PDRadiopharma to Present at the Drug Discovery Symposium (Protein/Peptide Track) at CPHI Japan 2026

Dr. Masato Murakami, President and Representative Director, will deliver a presentation at the Drug Discovery Symposium at “CPHI Japan 2026 (International Pharmaceutical Development Expo),” to be held at Tokyo Big Sight from April 21 (Tue) to 23 (Thu), 2026.

[Title] Modality evolution and ecosystem: strengthening Japan’s drug discovery through peptide innovation

[Date] 2:20-3:20pm April 21, 2026 (JT)

This presentation will explore how peptide drug discovery, together with radiopharmaceutical theranostics, can strengthen Japan’s innovation capabilities through modality evolution and ecosystem design.

Drawing on collaborations across start-ups, pharma, CDMOs, and academia, the session will highlight key challenges and opportunities in building an integrated value chain—from discovery to manufacturing, isotope supply, and clinical development.

PDRadiopharma remains committed to advancing next-generation modalities and contributing to global healthcare through innovation in radiopharmaceuticals.
